

Assoc. Prof. Dr. Blaž Likozar

Assoc. Prof. Dr. Blaž Likozar is the head of the Department of Catalysis and Chemical Reaction Engineering at the National Institute of Chemistry (KI), where he is also head of the Chemical Reaction Engineering program and numerous research projects (15 H2020 / 50 solely in Horizon Europe). His expertise includes (among others) materials for catalysis, inventory, prediction, and improvement of fluid flow, transport phenomena, and chemical kinetics. In 2014-2015, he worked at the University of Delaware as a Fulbright Program researcher. He is the author of more than 340 scientific papers, has been cited over 9,000 times, and has an h-index of 49 (Scopus). He also participates in numerous industrial projects, including with TotalEnergies, Evonik Industries, UPM, Novartis, Carbon Recycling International, etc. He is a recipient of the Pregl Award and the Zois Recognition.
